Digital Evidence - Platform Solution

Overview

DigitalOnQ is a fully dedicated and secure image and video management solution for agencies that have a need to manage large quantities of photos or video. DigitalOnQ is the perfect solution to replace managing and storing images on CDs or DVDs and will eliminate the risk, liability and time associated with storing files on physical disks. DigitalOnQ will prevent and track photo tampering and editing and allow you to quickly see all metadata, all while being fully integrated with EvidenceOnQ. The user can quickly view hundreds or even thousands of media files and easily select the ones needed for review, sharing or distribution.

DigitalOnQ will significantly reduce the labor and material costs associated with outdated methods of managing your digital evidence such as downloading from memory cards, burning to expensive and trouble-prone CDs and DVDs, packaging, booking and storing discs as physical evidence.

Common Classification Of Digital Media Files

Video & Audio: Industry known and third party proprietary formats can be uploaded and played with compatible player.

Images: Supports JPG and RAW files.

Body-Worn Camera: Integrates with multiple BWC manufactures.

Manage & Track YOUR Body-Worn Cameras

With the ever growing need for organizations to implement body worn camera technologies, we offer a seamless way to manage and track the devices used along with the digital files they capture. **Ask us how...**

Digital Evidence

Import / Secure / Store

1. Import Directly From Storage Source

- Import from any storage source Cameras, CDs, flash drives, external hard drives, servers, or others sources
- Import large volumes of archival, current, and future media data
- Group or associate evidence into categories.

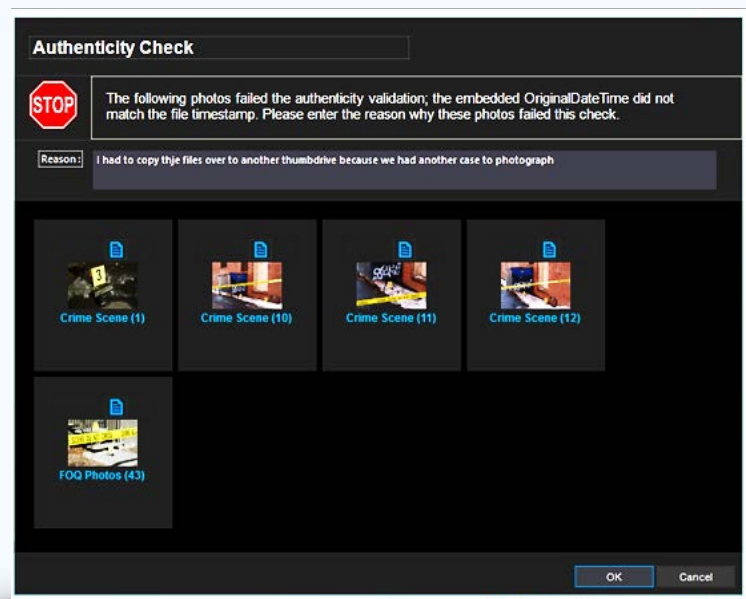

2. Maintain Original Metadata

- Camera make/model, date/time taken, camera settings, image size, GPS location

3. Centrally Located

- One-click access to media
- Provides a 100% SWGIT compliant and secure repository

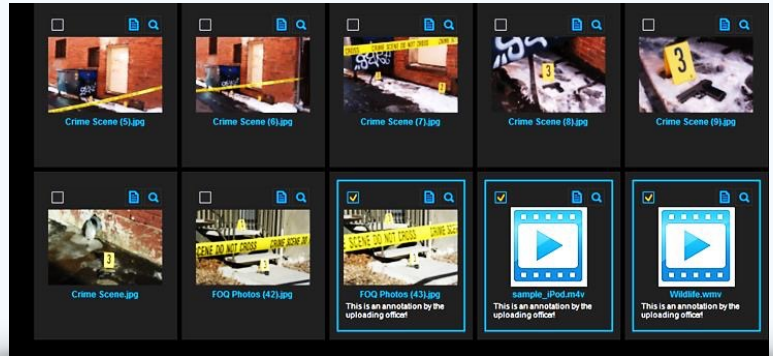

View / Manage Media

1. Find and View

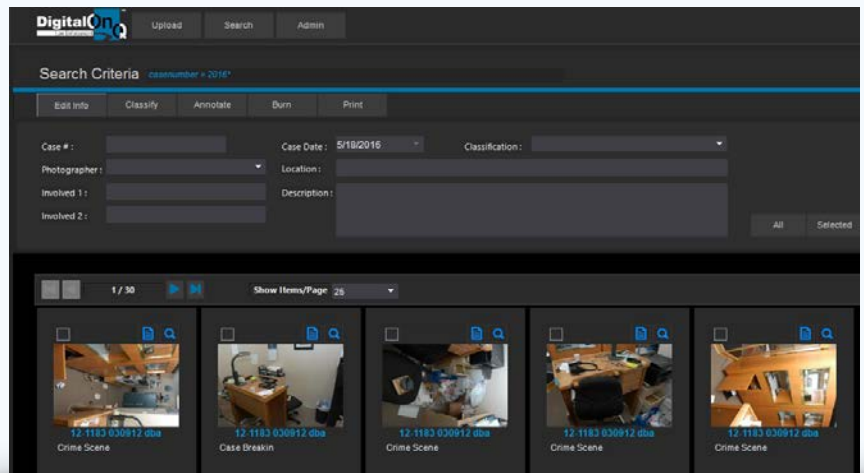

- Search by name, case number, type, date, photographer, and any metadata field
- All media can be dynamically viewed in a detailed thumbnail view

- View meta data of every image
- Simple one-click preview access
- View image in full-screen with zoom in, zoom out and rotation
- View full chain of custody of digital evidence

2. Manage Media From a Single Screen

- Edit Metadata
- Annotate
- Classify
- Print
- Burn CD/DVD

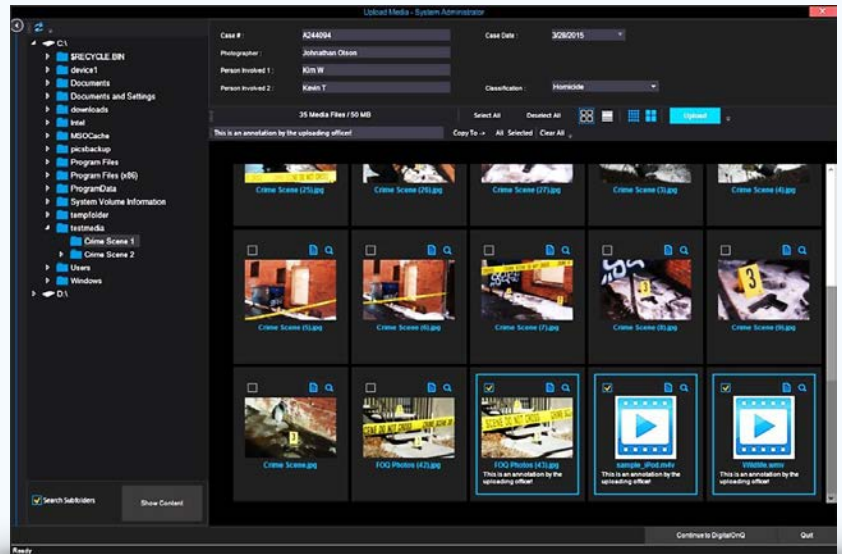

Distribute / Share Media

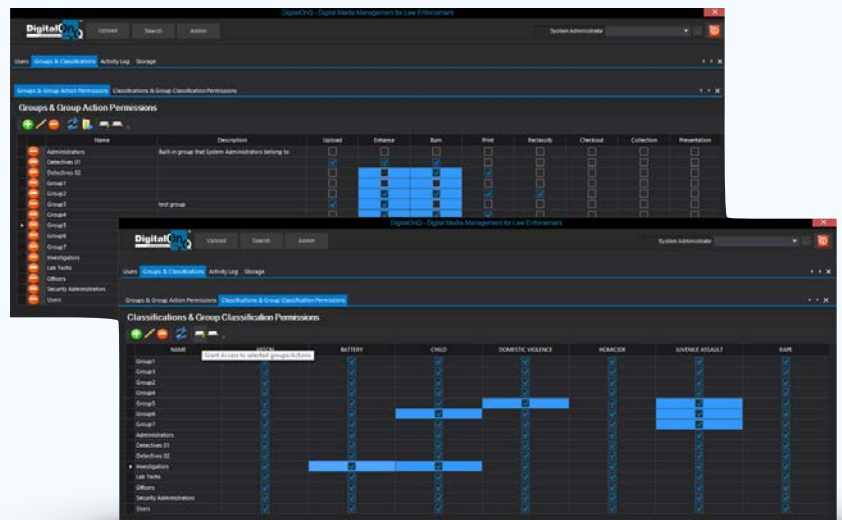

1. Share and Distribute

- Fully integrated with physical evidence system (EvidenceOnQ)
- Securely allow remote viewing of selected media or collections related to case
- Approved personnel can view both physical and digital media evidence from one platform

2. Burn and Archive

- Burn to CD/DVD with a few clicks
- No copies left on the local hard drive
- Verifies burned media as a working copy

Other Features

Seamless Integration

Store all your evidence in one place. Investigators, prosecutors and others can view both physical evidence records and digital media evidence from one platform. There's no need to utilize two systems, or to request CDs or DVDs to review videos or images related to a case. One-click access to the DigitalOnQ repository provides a complete and customizable evidence solution.

Security and Compliance

DigitalOnQ provides a 100% SWGIT compliant and secure repository for all images, video and other forms of digital evidence. Image authentication processes are built-in, so original images are always preserved and are tamper-proof. Enhancement tracking shows any edits, processing modifications, or movements made to any media type.

Powerful user access controls allow admins to restrict who can view, access and modify media at any level. For example: Control who has access to features, like upload, burn, print and classify or limit access to certain classifications like internal affairs, juvenile, shootings, homicide, etc.

*Agencies see significant ROI from reduced costs and staff-hours.***
